OUTLINE OF THE COURSE

Objectives

Full Blast is an exciting and easy-to-use course in English. The main concern of the writers of this course has been to explicitly demonstrate how English is used in real-life situations, thus enabling learners to use it in meaningful contexts. *Full Blast* has been meticulously designed to build learners' ability to communicate their ideas fluently, accurately and confidently.

Goals

Full Blast follows the requirements of the Common European Framework of Reference for Languages (CEF). It aims at achieving the following goals:

- **Communicative** - to help students establish relations, exchange information and express ideas, attitudes and feelings.
- **Socio-cultural** - to help students grasp an understanding of everyday life patterns of their age group. This covers topics such as home, leisure, etc. in the target language.
- **Learning how to learn** - to help students plan their work over a time span and set themselves realistic objectives.
- **Language and cultural awareness** - to help students acquire an understanding of the language and culture.

Syllabus

Full Blast follows the modular approach, which enables students to deal with topics in depth and over a longer period of time. Moreover, the course uses an integrated approach to all four language skills (reading, listening, speaking and writing) in a carefully graded and well-organised, user-friendly syllabus combining functions, structures, vocabulary, pronunciation and communication skills. A building-block strategy has been employed through which every lexical and grammatical item is carefully presented and systematically revised, enabling students to acquire the language naturally and use it in meaningful contexts. Communicative language teaching is viewed as a practical activity rather than a theoretical notion.

Organisation and length of the course

Full Blast 1 First Intermediate School - First Semester, the first book in the series, effectively meets the needs of learners with little or no previous exposure to the English language. It leads students towards level A1 (Basic User/Breakthrough) of the CEF.

The Student's Book is organised in four modules, each of which is based on a general topic. The modules are well-organised within a steady framework. Each module consists of a cover page, 5 two-page lessons, a two-page round-up section and a culture or a cross-curricular page. In this way, students are presented with different aspects of the same topic. The modular approach promotes progress in all dimensions and by the end of the course, students will have been systematically exposed to the functions and structures outlined in the contents. Additionally, they will have been given the opportunity to develop all four skills, having been given adequate practice throughout the book. The precise time needed to complete the course will vary according to factors such as school organisation, class size, learner ability and motivation.

Key features

Certain key features of the book add to the challenging and motivating material of the course:

- **Motivating and contemporary topics** related to the interests of teenagers.
- **Lively dialogues** presenting real spoken English.
- Emphasis on **vocabulary building**.
- **Cross-curricular** and **cultural** information.
- **The language** used. It is principally British English. However, the writers have taken into consideration the fact that English is spoken as a first, second or foreign language throughout the world. Therefore, students are exposed to linguistic varieties as well as texts and information about various English-speaking countries and cultures.
- **Personalisation activities**.
- Opportunities for promoting **learner autonomy** with learning objectives on the cover pages, learning tips throughout the book, projects and a self-assessment section (Portfolio).

COURSE COMPONENTS

Student's Book including Workbook and Grammar Book

The **Student's Book** contains:

- A table of contents for the Student's Book presenting the topics, vocabulary, structures, functions, pronunciation as well as the language skills practised in each module. Also, a table of contents for the Workbook and the Grammar Book.
- A Hello section and four modules. Each module is divided into a cover page, five lessons, a Round-up section and a culture or a cross-curricular page.
- A grammar reference section with useful tables, examples and explanations of the structures dealt with in each module.
- A speaking section including pair work activities.
- A section with tips helping students to acquire good learning habits inside and outside the classroom and covering areas such as vocabulary, grammar, reading, listening, speaking and writing. Different learning tips are also presented throughout the lessons.
- A word list containing the active vocabulary in alphabetical order per lesson.

The **Workbook** is in full colour and is closely linked with the Student's Book. It consists of eleven pages per module comprising vocabulary, grammar, communication, reading and writing development tasks and provides students with further practice of all the linguistic items dealt with in the Student's Book. It is recommended that some of the exercises in the Workbook should be done in class but most of them should be assigned for homework. At the end of the Workbook there is a four-page consolidation section where students are able to reinforce and consolidate what they have learnt.

Portfolio: This can be found within the Workbook. The Portfolio is made up of personalised and motivating *projects* as well as a two-page *self-assessment section*. The *projects* can be found at the end of each module and are closely related to the topic of the module. Each project is meant to be done when the module has been completed, hence providing an opportunity for revision and consolidation. Furthermore, students gain confidence and a sense of achievement as they use the language they have acquired in a creative manner.

The *self-assessment section* is meant to be done when the material has been completed. This section enables students to assess themselves and record their progress, and promotes self-awareness about their strengths and weaknesses. It also enables teachers to see whether any remedial work is necessary.

The **Grammar Book** is also in full colour and is designed in accordance with the syllabus of the Student's Book. Each structure is presented in meaningful context and there are grammar boxes where the use and the formation of the grammar structure is presented, along with various necessary rules and notes. There are also carefully graded tasks, as well as communicative, oral and written activities. Lastly, at the end of each module there is a revision section for consolidation. The students are therefore provided with further practice of the structures taught in each module.

Student's audio CD

The **FREE Student's audio CD** includes vocabulary, dialogues, texts, listenings, pronunciations and the culture and cross-curricular pages from the Student's Book and is meant to give Ss extra practice at home. The Student's audio CD tracklist can be found at the end of the Workbook.

Teacher's Manual

The **Teacher's Manual** contains:

- An introduction.
- **Teacher's Notes** for each lesson of the Student's Book. Each lesson includes tables of the functions, structures and vocabulary introduced and useful notes for teaching. These notes provide teachers with a step-by-step guide to each stage of the lesson within a flexible framework that allows teachers to adapt the activities to their own teaching style as well as to the students' needs. Answers to all exercises, transcripts of the listening exercises and the aims for every activity in the Student's Book are also included.
- Ideas for optional activities which help students get a better understanding of the vocabulary and grammatical structures or forms introduced and provide them with an opportunity for further practice.
- Background notes on different topics which aim at providing teachers with useful information about the texts appearing in the Student's Book.
- Language Plus boxes which give more detailed information about the new linguistic items presented in each lesson.
- The tracks (▶▶ 22 = Track 22) for all the recorded material included in the class CD.
- The **Workbook Key**.
- The **Grammar Book Key**.
- The **Class CD Tracklist**.
- **Pacing charts**.

Class CD

The Class CD includes all the recorded material from the sections in the Student's Book where the symbol  appears.

Test CD/ CD-ROM

The Test CD/ CD-ROM contains:

- 4 tests corresponding to the modules of the book
- a final test

- keys and transcripts

- the recordings of the listening tasks of the tests.

All the tests include vocabulary, communication, grammar, listening, reading and writing tasks.

The tests can be printed in their original form. However, the teacher also has the ability to add, omit or change the order of the items and/or exercises according to the needs of their classes.

THE STRUCTURE OF THE MODULES OF THE STUDENT'S BOOK

Hello

This section familiarises students with the English alphabet, basic vocabulary and classroom language. Students are also introduced to the English-speaking world, clearly demonstrating that English is an international language spoken in many countries and different societies.

Modules 1-4 (an overview)

Each module consists of a cover page, 5 two-page lessons, a two-page round-up section and a culture or a cross-curricular page. The lessons focus equally on lexis, grammar, language functions and communicative skills. In the first four lessons, the target language (vocabulary, grammar, functions) is presented and practised extensively. In all five lessons, the four basic skills (reading, listening, speaking, writing) and micro-skills are developed in an integrated manner. In the fifth lesson, there is special emphasis on listening, speaking and writing. Furthermore, the round-up pages at the end of each module thoroughly revise the functions, grammar and vocabulary that have been taught in the preceding lessons through exercises, speaking and writing activities, as well as rhymes. The *Now I can* section also included offers students a unique opportunity for self-evaluation. Lastly, the culture or the cross-curricular page at the end of each module is related to the topic of the preceding module.

Cover page

The cover page is the first page of the module. Ss are introduced to the topic of the module through a discussion. Then they are asked to locate five pictures in the module. The purpose of doing so is to create a sense of anticipation. The third section of the cover page is a set of learning objectives. Students read about what they will learn in the module, which increases motivation and helps them become autonomous learners.

Vocabulary

Before students deal with texts or grammar, they are presented with the key vocabulary in order to facilitate understanding and communication. Vocabulary is presented through visual clues which make the presentation more appealing and comprehensible to students. The lexical items presented are always related to the topic of the module and are semantically grouped. Particular attention has been paid to the selection of useful, high-frequency lexis while it is borne in mind that vocabulary is not just lexis but also phrases or chunks of language which have the same function that single words do.

Students are further helped to learn vocabulary with the inclusion of useful advice given throughout the book in the form of **tips**.

Reading

Reading can be divided into two parts:

• Dialogues

The aims of the dialogues throughout the book are to present vocabulary, structures and functions in context and to expose students to everyday spoken language through meaningful contexts. All the dialogues have been specially designed to familiarise students with spoken English in a variety of different real-life situations and they can be dealt with as both reading and listening activities. These dialogues rouse students' interest through witty exchanges in up-to-date, modern English, the objective of which is to promote learning in a communicative way. The dialogues are accompanied by a wide range of comprehension activities, such as open-ended questions, True/False exercises, identifying speakers, gap filling, extracting specific information, etc.

• Different types of texts

There is a variety of reading material: factual texts, comic strips, e-mails, signs and notes, quizzes, magazine articles, surveys, etc. The texts cover a broad range of motivating and contemporary topics and provide students with interesting, multi-cultural, cross-curricular information about the real world. The texts have been carefully selected not only for their language content but also for their interest and appropriateness to the level and age of students this course is intended for. The texts and tasks aim at the development of reading micro-skills with the emphasis on reading for gist and for specific information. Teachers should use the pre-reading questions provided in the Teacher's Manual to introduce the topic of the reading text and facilitate students' further comprehension of it. In the Teacher's Manual there are also post-reading questions which give students the opportunity to expand on the topic of the text and use the new vocabulary to talk about themselves.

Students are further helped to develop their reading skills with the inclusion of useful advice given throughout the book in the form of **tips**.

Grammar

The aim is to present grammar gradually (building-block strategy). In the grammar section, the formation of the structure dealt with each time is presented through clear and straightforward tables, while its usage is illustrated through notes and/or examples. However, as in the vocabulary section, students are actively involved in the understanding of grammar as they are asked to find examples of the particular structure in the dialogue/text in order to see grammar in context. The grammar is presented in more detail in the Grammar Reference section at the end of the Student's Book and is further practised in the speaking and writing activities. The section ends with a simple activity which allows students to use the structure they have learnt in context and teachers to check their students' comprehension of the particular structure. These activities can be completed in class, either in pairs or individually. Students can also use their Grammar Book section for further practice.

Pronunciation

It is important to sensitise students to the different sounds of the foreign language and give them as much practice as possible. The aim is not for students to acquire a native-like pronunciation but to enable them to speak intelligible English. The pronunciation section deals with significant

aspects of spoken English in an organised manner and is linked to the language of each module. It is in the form of a listen-and-repeat drill, presenting and providing controlled practice of individual sounds.

Listening

The topic of the listening task is always related to the topic of the lesson. A variety of spoken text types and task formats have been employed through which important listening micro-skills are developed. The focus is on listening for gist and/or specific information. Therefore, it is always a good idea to have students read through the questions/gapped text, etc. first and make predictions about the possible answers using the prompts given, such as pictures, tables, etc. It is always important to stress that students do not need to understand every word that they hear. After making sure that students have understood the instructions and the language included in the questions, play the CD two or more times if necessary. Elicit answers from students and ask them to justify their answers. Then, if necessary, play the CD again and clarify any points that have not been understood.

Students are further helped to develop their listening skills with the inclusion of useful advice given throughout the book in the form of **tips**.

Speaking

Speaking tasks provide students with further practice of the vocabulary, structures and functions presented and progress smoothly from controlled to freer practice. Students are engaged in meaningful communication and emphasis is placed on communicating for a particular purpose. Students usually work in pairs or groups and perform a variety of real-life tasks (guessing games, surveys, memory games, spot the differences games, etc.). By doing so, the amount of time students speak is increased significantly and cooperation among students is encouraged. In addition, pair and group work help to lessen students' communicative stress. Verbal and/or visual prompts are always provided to facilitate the students' task.

Students are further helped to develop their speaking skills with the inclusion of useful advice given throughout the book in the form of **tips**.

Writing

Writing is perhaps one of the most difficult skills for students to master. The writer must take many things into consideration: handwriting, spelling, punctuation, paragraphing, purpose, audience, syntax. For this reason, the course has paid particular attention to this skill. Students are introduced to writing smoothly, starting with gapped activities, simple sentences and then moving on to longer texts. The book helps students build up their writing skills by integrating the skills as the writing activities are usually based on the preceding speaking activities. Students are also provided with guidance concerning different types of writing and activities which help develop writing skills. More importantly, students are provided with a model text so they are exposed to a sample of what they have to produce.

These writing tasks are particularly suitable for homework, as they give students the opportunity to revise the language introduced in the lesson and expand on the topic. Instructions should be explained carefully in class, as it is

important to ensure that students have fully understood what they are expected to do. Students' written work should always be corrected (not during class time) and returned to students in due course. Alternatively, students could work in pairs and correct each other's work before giving it to the teacher. Moreover, students should be familiarised with a correction code, like the one that follows, which will help them identify and correct their own mistakes.

WW : wrong word	A : article
S : spelling	WO : word order
P : punctuation	^ : something missing
T : tense	

Another way to deal with writing is as a cooperative activity. Writing in pairs or groups can be highly motivating for students and incorporates research, discussion and peer evaluation.

Students are further helped to develop their writing skills with the inclusion of useful advice given throughout the book in the form of **tips**.

Round-up

The Round-up pages consist of exercises revising the vocabulary, grammar and communication activities in the corresponding lessons as well as a speaking and a writing activity. Students are asked to work out their score and see how well they have done. There are also self-evaluation charts (Now I can) where students can check their progress. These charts give students the opportunity to take responsibility for their learning. They see what they can do with the language they have learnt and evaluate their own strengths and weaknesses. Lastly, every Round-up has got a Rhyming Corner. Here students can come into contact with different kinds of rhymes. They are also asked to do an activity, such as completing blanks or circling the correct words before listening to the rhyme. This allows students to develop cognitive skills and also motivates them to listen to the rhyme so as to see if they have guessed correctly.

Culture and Cross-curricular pages

At the end of every module there is a culture or a cross-curricular page. This page is related to the topic of the preceding module and further introduces students to different cultures or cross-curricular topics. More multi-cultural and cross-curricular information is included within the modules. Students are not expected to learn the unknown vocabulary they may encounter here.

POINTS TO REMEMBER

- Whether a task is carried out in class or assigned as homework, make sure that students fully understand the rubric and are clear about what they need to do.
- For most activities, it could prove helpful to demonstrate through examples what the task requires them to do, by doing the first item. This is especially recommended in all speaking activities.
- Whenever a task requires understanding gist, the teacher should not explain unknown words, thus encouraging students to focus on gist only. Whenever necessary, however, certain key words that block understanding could be explained.
- Regarding the grammar section, students will feel more confident if unknown words are explained before they do the grammar activities.

- When correcting students' written work, it is suggested that a list of commonly-made mistakes is made. The information gathered could then be pointed out to students orally or in written form on the board.
- When explaining new lexical items, a variety of techniques could be employed such as example sentences, mimicry, definitions, antonyms, synonyms and/or translation.
- Wherever elicitation procedures are required, it should be ensured that each student has the opportunity to speak before corrections are made by the teacher.
- In cases where students are asked to do guesswork, no answers should be revealed before students proceed to the actual task and check their predictions.
- It is advisable that teachers use the students' L1 when necessary (e.g. to initiate a discussion on a topic in order to activate students' background knowledge, to explain grammar rules).

Suggested Pacing Chart for Full Blast 1

The weekly pacing chart on pages 73-79 has been created for a sixteen-week semester, in which the students have four sessions per week. Holidays have also been taken into consideration; therefore the total number of sessions has been calculated to be sixty-two.

So, 16 weeks x 4 sessions per week = 64 sessions **minus** 2 sessions for holidays = 62 sessions altogether.

Since the dates of holidays vary from year to year, the holidays have not been included in a specific week in the weekly pacing chart. Instead, the final week (week 16) is shown to have two sessions rather than four.

Fourteen sessions are required for each module to be completed. Specifically, the sessions are as follows:

- 2 sessions (cover page and lesson a)
- 2 sessions (lesson b)
- 2 sessions (lesson c)
- 2 sessions (lesson d)
- 1 session (lesson e)
- 3 sessions (round-up – SB, WB, GB, project)
- 1 session (cross-curricular/culture page)
- 1 session (test)

Furthermore, the following sessions have also been determined:

- At the beginning of the semester:
✓ 3 sessions for the Hello section
- At the end of the semester:
✓ 2 sessions for Consolidation: Modules 1-4
✓ 1 session for the Self-assessment section and remedial work before the Final Exam.

Abbreviations used in pacing charts

Ss = Students
p. = page
pp. = pages

NOTES:

Be sure to familiarise students with their new book at the beginning of the first session.

Recommended homework for every session:

It is suggested that the Ss are asked to study the active vocabulary of each session.

Also, they should be given a few sentences from each session to copy and study for dictation.

In class:

Always check homework at the beginning of each session.

Make sure that students understand what activities they have to do for homework, as well as how they should be done.

When doing projects, have a few Ss present their work to the rest of the class. (Be sure to have a different student presenting each time so that all students are given the chance to present a project.)

Suggested Pacing Chart for Full Blast 1

(for Holy Qur'an Memorization Schools)

The weekly pacing chart on pages 81-86 has been created for a sixteen-week semester, in which the students have three sessions per week. Holidays have also been taken into consideration; therefore the total number of sessions has been calculated to be forty-six.

So, 16 weeks x 3 sessions per week = 48 sessions **minus** 2 sessions for holidays = 46 sessions altogether.

Since the dates of holidays vary from year to year, the holidays have not been included in a specific week in the weekly pacing chart. Instead, the final week (week 16) is shown to have one session rather than three.

Eleven sessions are required for each module to be completed. Specifically, the sessions are as follows:

- 2 sessions (cover page and lesson a)
- 2 sessions (lesson b)
- 2 sessions (lesson c)
- 2 sessions (lesson d)
- 1 session (lesson e)
- 1 session (round-up – SB, WB)
- 1 session (test)

Furthermore, the following sessions have also been determined:

- At the beginning of the semester:
- ✓ 2 sessions for the Hello section

Abbreviations used in pacing charts

Ss = Students

p. = page

pp. = pages

NOTES:

Be sure to familiarise students with their new book at the beginning of the first session.

Recommended homework for every session:

It is suggested that the Ss are asked to study the active vocabulary of each session.

Also, they should be given a few sentences from each session to copy and study for dictation.

In class:

Always check homework at the beginning of each session.

Make sure that students understand what activities they have to do for homework, as well as how they should be done.

When doing projects, have a few Ss present their work to the rest of the class. (Be sure to have a different student presenting each time so that all students are given the chance to present a project.)

Culture / Cross-curricular pages:

These are optional and can be given to Ss as extra reading practice at home or they can be done in class if time permits.
